

Creating the best shopping experience

'ABEJA Insight for Retail' is a service that helps retail stores to provide the best shopping experience for all customer.

Creating a store convenient to shop for every customer

By analyzing data, we improve the shopping experience for all customers. Being able to shop more efficiently and finding the exact item you are looking for. Data can help create a more convenient and better shopping experience for all customers visiting the store.

We use the latest technology to protect your data!

The data we collect and analyze is managed in a highly secured cloud. Please understand the facial data may be used to improve the accuracy of analysis and will be saved up to 30days before being completely erased. After the data is erased, it will be converted into a form impossible to identify individuals.

1

The cameras installed in the store will capture facial images. It does not identify who you are.

2

We analyze the collected images and convert it into data. After analyzing, the facial data may be used to improve the accuracy of analysis and will be saved up to 30days before being completely erased.

3

We aim to provide each customer the best shopping experience by analyzing and utilizing the data and improving store operations.
